NANOSYS

Bio-Detoxing TECHNOLOGY*Fundamentally different ingredients*

NANOSYS is different from the beginning.

Bio-Convergence TECHNOLOGY*Applying an innovative extraction method*

Innovative extraction methods to maintain maximum benefits and effects of ingredients

Nano TECHNOLOGY*Maintains effectiveness until it penetrates into your skin*

Key to maintain a highly efficient extraction is Bio-Convergence TECHNOLOGY.

Dermaceutical TECHNOLOGY*Research on skin elements and their mechanism*

From Bio-Detoxing to Nano Technology, all of the processed ingredients have passed dermatology test.

NANOSYS*Union of TECHNOLOGIES*

4-Technologies + Japanese Pyuru R&D team cooperates with NANOSYS KOREA for NANOSYS's advanced technical skills

- NANOSYS verifies patents and reference for researches on detoxification and excretion method.
- Selecting the most proper and finest ingredients for detoxification.

Green Herb Complex

A compound containing Chrysanthemum, Mulberry leaves, Chamomile and Lemon balm.

NANOSYS's special ingredient focus on detoxifying.

Detoxing Herb Complex

A compound containing Rose hip, Chamomile and Rosemary.

Fast soothing and detoxifying skin.

White Saponaria

An excellent natural ingredient for detoxifying that cleans deep down inside the skin pore.

Chlorella Extract

Relieves stress and helps blood circulation to activate lymph cell for detoxifying, and reducing dark circles, and eye bags.

Seaweed Extract

Enriched iodine reduces swelling and helps detoxifying. Main active ingredients in Iodine are Alginic acid and Polysaccharide, excretes from our body.

Ivy Extract

Great for anti- inflammation and detoxifying, preventing skin troubles and soothing tired skin.

Bio-Convergence TECHNOLOGY

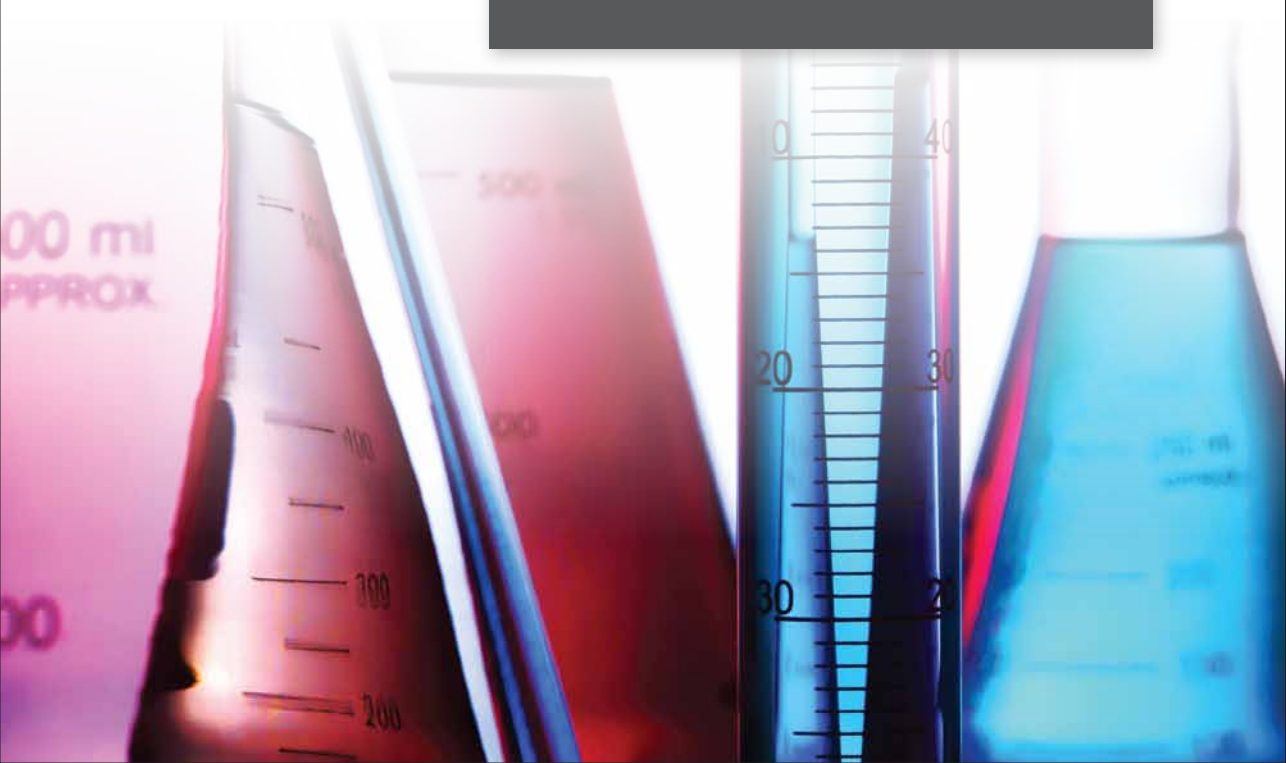

- ✓ NANOSYS engages in scientific research on the skin via many different types of Bio-convergence extraction methods.
- ✓ Extraordinary scientific methods are applied to acquire completely clean ingredients.

Supercritical Extraction - A new innovative extraction process that is used for supercritical fluid such as propane or butane, to extract active ingredients from plants with maximum efficacy.

Plasma Extraction - When heat is applied to a material in gas state, it becomes a compound of ion nucleus with free electrons.

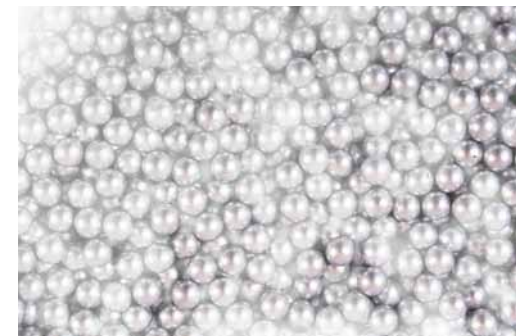

Phytoncide Extraction - A method for extracting essential ingredients without causing any damage during extraction by using steam, which has a lower boiling point than the ingredients.

Bio-Convergence Extraction - Uses enzyme or yeast for polymerization instead of catalyst to extract ingredients.

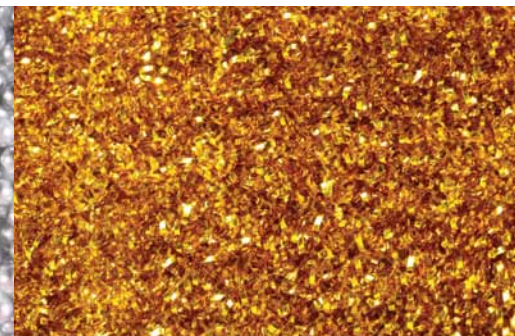

NANO - TECHNOLOGY

- ✓ A technology for processing extremely tiny molecules in 1/1,000,000,000,.
- ✓ Breaks the ingredients into different nano-sizes to gradual penetration into skin layers.
- ✓ Nano sized ingredients are formed into a different thicknesses of capsules and the ingredients break out of the capsules in different time intervals.

NANO-Arbutin

NANO-Gold

DERMACEUTICAL - TECHNOLOGY

- ✓ NANOSYS is researching on active ingredients and chemical compound that contain active ingredients in order to minimize of skin irritation.

All NANOSYS products are dermatologist tested.

Method	In-Vivo test
Result	Confirmation on dermatology tested
Subject	All products of NANOSYS, NEOGEN, & DR. ZELL
